# Cindy Crawford

*Get to know the star of our new campaign*

***"I love healthy food but I couldn't live without chocolate."***

*Cindy Crawford*

When she enters the studio, everyone is amazed by the warmth and confidence in every single one of her gestures. She's smiley and very professional.

Dressed meticulously in black and wearing a leather jacket, it's difficult to imagine that this down-to-earth woman, who shakes hands with every single person on the team, has walked down the most prestigious catwalks and posed for the top designers of all time.

This American supermodel's secret to success is simple, and has a lot in common with Cosentino's core values: a solid family relationship, passion for her work and humility. It's not difficult to imagine why she's the star of the new Tops on Top campaign.

After shooting, we interviewed her to discover the biggest loves and passions of one of the most inspirational Top models of all time.

## Choose slate paint

Thanks to this type of paint, you can easily redesign your kitchen, using it on walls, furniture and appliances alike. Go for traditional colors like green and black or choose innovative options like yellow or lime.

## Add decorative vinyl

It will allow you to give new life to your kitchen and masterfully update its look. You can use it to redecorate the front of wardrobes and drawers or to change the look of your appliances.

## A gorgeous backsplash

Create the quintessential work area. Choose materials which allow easy cleaning and maintenance. You can choose the same color to obtain a visually unified kitchen or something totally different to create interesting contrasts.

## Choose black for your kitchen

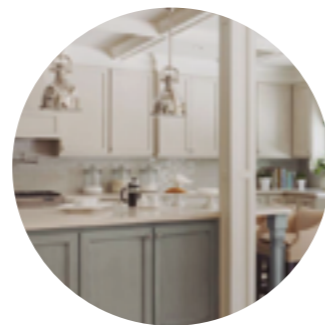

If you like contemporary designs and your kitchen is especially light, choose the color black to create a modern, sophisticated look. Bright white contrasts are equally impactful.

## Out-of-place objects

Make your kitchen transmit originality and personality by introducing elements which aren't a part of it. Some examples could be a large painting leaning against the wall or a sculpture.

## Mix different styles

Design a unique kitchen by mixing Nordic style and Rustic style: contemporary furniture in a very industrial style space, with appliances on view, brick walls and cement floors.
